

ILP Register

The ILP Register is in its final stages of completion - we expect to release it very soon.

When complete, the ILP Register will support the work of supervisors of ILPs across the school.

ILPs for a given year can be viewed together in list form.

Various filter functionality for the Register will be progressively released - we will be looking for input from schools on filters they want!

Initial filters to be released include:

- School
- Form Run
- Selected Workflow Status
- Overdue Workflows

Column headers will be clickable to enable sorting of returned records.

Management features such as Set Workflow Dates (bulk) are found on the ILP Register screen. This feature is usable now.

Simply click the Set Workflow Dates button on the ILP Register.

Individual Learning Plan										SET WORKFLOW DATES   SAVE

ILP Register access

A new ACL, Teaching: **"ILP Register"**, permits use of the ILP Register functionality and some management functions. We recommend you build a new ACL Group "ILP Register", include the ACL in this group, then make all ILP Register users members of this group.

We'd expect granting of ILP Register to be restricted to staff who supervise or oversee ILPs.

Navigation

The ILP Register button is found in the Classic Menu - Learning > ILP Register. This will only appear if the ACL is granted.

The screenshot shows the Edumate Classic interface. On the left is a navigation menu with the following items: Setup, Learning (highlighted with a red underline), Online Classroom, Scope & Sequence, Copy Units, Learning Tasks, Markbook, Criteria Log, Course Reports, Summation Reports, Manage Marks, Student Places, Print Reports, Learning Reports, External Test Results, and My Lessons. At the bottom of the menu, the 'Ilp Register' button is highlighted with a red rectangle. The main content area is titled 'Individual Learning Plan:' and contains a table with student information.
